WebEx Video Conferencing to Iraq

Our firm has started using the Cisco Systems WebEx video conferencing and online meeting service. This product will allow multi-person video conferencing in an online meeting where applications from the host can be shared with online meeting participants.

You may recognize Carol Guthrie, from our firm, in these photos. Her brother is deployed in Iraq right now with the National Guard and we decided to put WebEx to the ultimate long-distance test.

The service worked well and it was really cool to see family members united via a video conference! (Thanks to all of those in the military for your service to our great country!)
